Help for the industry – from the industry

Roof Work and Work at Height

Introduction

The construction industry has taken huge strides forward in tackling risk and reducing injury rates over recent years but still has a significant opportunity to make our high-hazard industry safer and to drive down the alarming rates of accident and ill health linked to construction work in particular to Working at Height and Roof works. Falls from Height is still the highest rate of accidents in the construction industry.

This free half day event will provide self-employed builders and small construction companies with practical up-to-date information, help and advice.

The information given on the day will help you take action to protect you and your employees' future health, safety and wellbeing.

Topics covered will include: Work at Height, Roof Ladder, Powered Access, Scaffold Inspection, Prevention Internal, and External Falls, Tower Scaffold.

The event will consist of talks and demonstrations with the opportunity to ask questions from those within the industry as well as HSE inspector.

Whether you are a self-employed jobbing builder or run a small building company this free event is a must.

Places at this event are limited and it is likely to be highly popular
